

Connecting a Mac to ESU Wireless

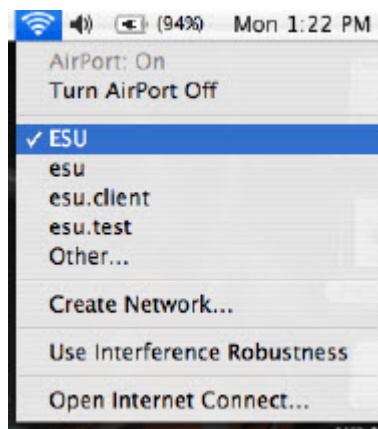

Instructions for Mac 10.4.9 and below

1. Select the Airport Icon in the Upper Menu Bar

Photo 1

2. Select the network called “ESU” in all uppercase.

3. A dialog box will be displayed: “The selected AirPort network requires a password to join.”

a. Enter your ESU User Name (used for email, Buzz In)

b. Enter your Password

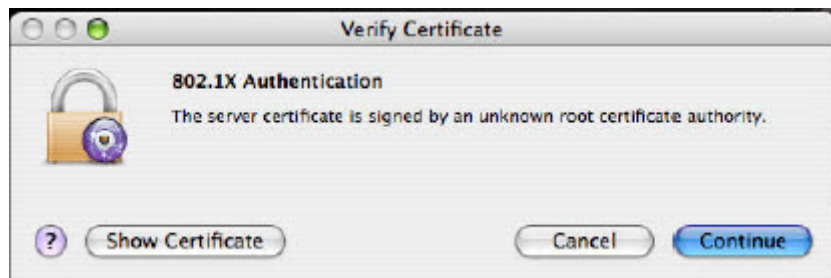

c. Leave the 802.1x Configuration field to Automatic

d. Click OK

i. NOTE: There is an option that asks “Remember password in my keychain”. Use this option if you so desire.

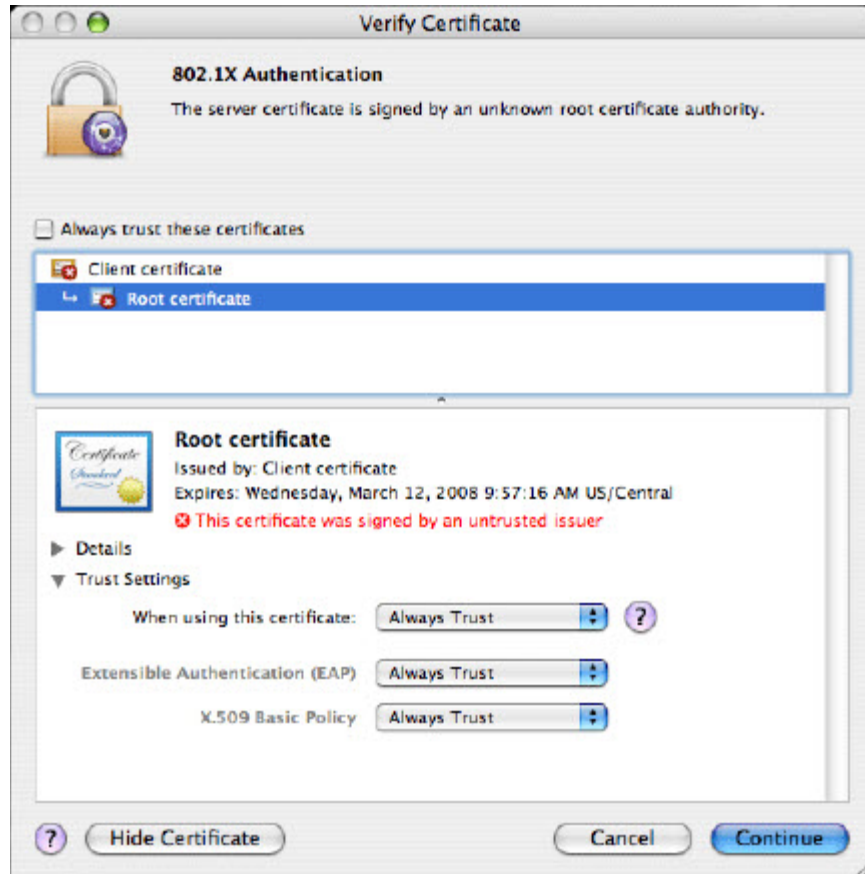

4. You will now see the Verify Certificate screen. You have Two options here:

a. Option 1: Click Continue and Skip to Step 5.

i. Note: Choosing Option 1 will cause you to be presented with the Verify Certificate screen each time you connect. To bypass this screen, select Option 2

b. Option 2: Click Show Certificate

- i. You will now be presented with an expanded version of the Verify Certificate screen.
- ii. Select the Arrow next to “Trust Settings” in the lower portion of the screen.
- iii. In the drop down box next to “When using this certificate” select the option “Always Trust”. Doing this will cause the Verify Certificate screen to not re-appear during future login attempts.
- iv. Click Continue
